

# VP101-M8M

ARM-Based In-vehicle Fanless Touch Panel PC

## Package Contents

1 x VP101-M8M System Unit
1 Switch Cable
12 Rubber Holders
1 ADDM UL Battery Addendum

## Bottom View

## Removing the Chassis Cover

Please observe the following guidelines and follow the instructions to open the system.

1. Make sure the system and all other peripheral devices connected to it have been powered off.
2. Disconnect all power cords and cables.

### Step 1:

The 8 screws of the system are used to secure the cover to the chassis. Remove the screws and put them in a safe place for later use.

### Step 2:

Slide the cover to open the system.

Step 3:

The boards can be easily accessed after the chassis cover is removed.

# Installing an M.2 Card

Please follow the steps below to install the card into the socket.

### Step 1:

Please follow the steps below to install the card into the socket.

Insert the card into the socket at an angle while making sure the notch and key are perfectly aligned.

### Step 2:

Press the end of the card far from the socket down until against the stand-off.

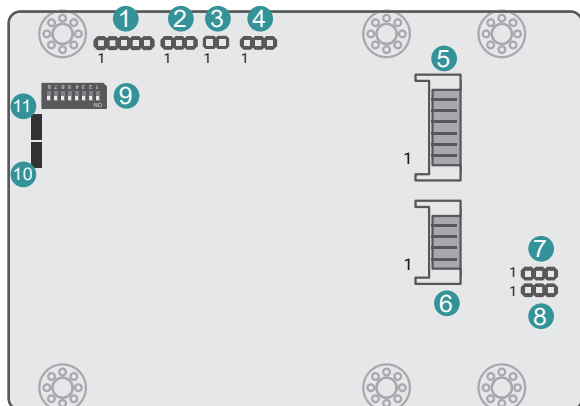

### Step 3:

Screw tight the card onto the stand-off with a screw driver and a stand-off screw until the gap between the card and the stand-off closes up. The card should be lying parallel to the board when it's correctly mounted.

# System Layout

## Power Board

- 1 ST-Link / SWD
- 2 MCU Debug
- 3 Remote Switch
- 4 Remote Switch High/Low Active
- 5 12V DC Out
- 6 9V~36V In
- 7 Host Bus Communication
- 8 Host Bus Communication
- 9 SW1
- 10 LED1(Red): Debug LED for the MCU
- 11 LED2 (Green): R/W LED

# System Board

System Board

- 1 USB2\_4
- 2 HDMI
- 3 Battery
- 4 Power Link
- 5 SIM Slot
- 6 LAN
- 7 USB3.0
- 8 DC-IN
- 9 Audio
- 10 DIO
- 11 Speaker
- 12 USB2\_3
- 13 VP IO
- 14 COM1 Debug
- 15 Boot CFG
- 16 LVDS
- 17 I2C
- 18 LED Backlight
